REFURBISHMENT OF ST SAVIOURS DOCK FOOTBRIDGE:

CLOSURE: 27TH NOVEMBER 2018

Refurbishment Works.

Since the beginning of November 2018, we have undertaken preliminary works outside the St Saviours Dock Footbridge. On the 27th November 2018, investigative and piling works commence in the dock area. In order to maintain safety to all users, the bridge will be closed. Pedestrians will be required to follow the marked diversion via Shad Thames and Mill Street.

Due to the complex nature of the refurbishment works, tides and the river profile, the bridge will remain closed until the Spring of 2019. Both Conway Aecom, the Council's contractor, and the London Borough of Southwark are aware of the inconvenience that this closure will cause to all users. We therefore delayed the full closure for as long as practicably possible. We sincerely appreciate your patience whilst we complete these works.

Should you require any further clarification on this, ConwayAecom have a Public Liaison Officer for this scheme who will be happy to help, the contact details are either by email helen.mcconnell@fmconway.co.uk or mobile 07917 518529.
